

## WHAT IS OZONE THERAPY?

Ozone (O<sub>3</sub>) is a molecule made up of three oxygen atoms. Ozone therapy is a natural treatment that infuses both medical grade ozone created by an ozone generator (O<sub>3</sub>) and oxygen (O<sub>2</sub>) gas into the body. When activated, the O<sub>2</sub> molecule becomes unstable and the extra electron of the O<sub>3</sub> molecule creates an increased amount of oxygen in your body.

## WHAT ARE THE BENEFITS?

- Enhances immune support.
- Increases antioxidant production.
- Supports wound healing.
- Antibacterial, Antifungal, Antiviral
- Reduces inflammation and pain.
- Cells proliferation
- Increase lymphatic drainage.

## HOW IS IT ADMINISTERED?

- Intravenously with blood (autohemotherapy)
- Injected into a muscle, joint or more
- Applied to skin in a gas
- Inserted into the body
- Ingested in an oil or water

Legal Disclaimer: Activated oxygen (ozone) treatments as well as IV vitamins and chelation treatments are not FDA approved for all individuals and thus not covered by insurance. As such we expect payments at the time of service and do not file insurance. All patients are required to sign consent and acknowledge that these procedures are not FDA approved.

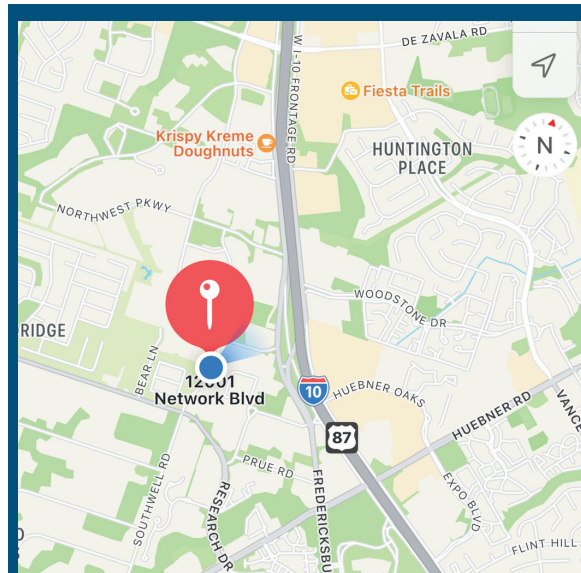

**Francis W. Mueller**  
**MD**  
**Owner**

**Kimberly Engelman**  
**MSN, APRN, FNP-BC**  
**Clinic Director/Provider**

Kimberly has been a Nurse Practitioner for 11 years, focusing on ozone for the last 9. She is nationally recognized for implementing ozone with peptides, light therapy, PRP, hyperbarics, IV therapies and more. She has extensively studied injection techniques from masters in the field, including prolozone, neural therapy, joints, trigger points, PRP, stem cells, and exosomes. She treats a wide range of conditions, and has played an integral role in healing some of the most intense symptoms.

Follow us: **O3Plustx**

**San Antonio's most unique  
complementary medicine clinic  
since 2016**

Led by nationally recognized specialists, O3 Plus helps patients who are on a quest for better health, immune system boosting, disease prevention, and to operate at peak energy levels. Using therapies based on extensive research, patients can experience lower inflammation, increased circulation, and rejuvenated health and well being for both chronic and acute conditions.

## Diagnoses Improved with Ozone:

- Pain: chronic, acute, nerve, trauma
- Infectious Diseases: bacterial, fungal, viral
- Osteoarthritis and Rheumatoid Arthritis
- Shingles, HSV, Eczema, Psoriasis
- Cardiovascular Disease
- Macular Degeneration
- Autoimmune Disorders
- Diabetes Mellitus
- Post Viral Fatigue

## Major Auto Hemotherapy (IV Ozone)

Major Auto Hemotherapy has a healing effect on the body and promotes general wellness, fights inflammation, and stimulates the immune system. This procedure is performed intravenously (IV) by withdrawing 200ml of blood, infusing with the ozone oxygen gas mixture (O<sub>2</sub>/O<sub>3</sub>), and then re infusing into the patient. This treatment takes approximately 45 minutes with just one needle stick, and lasts up to 6 months with multiple infusions. Most patients feel more energy, less inflammatory pain, clarity of thought, and better sleep after just one treatment!

## EBOO – Extracorporeal Blood Oxygenation and Ozonation

For patients who want to be aggressive in their care, our EBOO machine combines both ozonation of the blood and filtering of blood impurities. An IV is placed in each arm, pumping blood out and back in through a filter while getting ozonated at the same time. We've seen exception results when this procedure is added to the care plan.

## Hemealumen Light Device

Hemealumen Light Therapy enhances healing during MAH or EBOO treatment. In addition to being anti-microbial, color light therapy activates white blood cells, enhances mitochondrial deficiencies, stimulates lymphatic detoxification, and activates cytotoxic immune cells (NK cells). The perfect addition to IV ozone therapy.

## Prolozone Ozone Injections

Prolozone injections are used to treat chronic and acute pain and inflammation directly. Injections can be done into joints, subcutaneous and deep tissues, backs, and scars. The ozone oxygen gas is injected following a mixture of anesthetics, vitamins, and homeopathic remedies. Kimberly has an over 90% success rate with total pain resolution on knees.

## Platelet Rich Plasma (PRP) Injections

PRP Injections use your own blood to accelerate healing in a specific area. This regenerative therapy of harvesting your own platelets is added to our Prolozone injections to super charge regeneration of growth factors, optimizing conditions for healing. Our FDA-cleared Magellan machine has been independently verified to provide up to 14 times the amount of platelets found in blood. Not only good for joints, but for backs, faces, hairlines, and entire scalps.

## Nationally Recognized Providers

Our Clinic Director / Provider, Kimberly Engelman, MSN, APRN, FNP-BC, is a sought-after speaker on the national circuit for ozone therapy. She presents yearly at the annual American Academy of Ozonotherapy (AAOT) meeting as well as at Frontiers in Ozone meetings and workshops. Both FNP Engelman and Dr. Mueller are Fellows of AAOT, an academy of health professionals dedicated to establishing standards for the art and science of Ozonotherapy.

## Non-Ozone Treatments: Hyperbaric Chamber

The hyperbaric chamber is one of the best ways to increase oxygen delivery throughout the body, causing a cascade of beneficial healing responses. Benefits include wound and nerve healing, stem cell release, and increased mitochondrial function. This is ideal for patients who prefer to escape needles!!!

## PEMF – Pulse

## ElectroMagnetic Field

PEMF can improve cell metabolism, known as "cellular exercise." This non-invasive procedure recharges and electrically balances cells for proper repair and regeneration, leading to better sleep, accelerated healing, and more. PEMF will increase circulation and decrease inflammation. A wonderful treatment from NASA technology!

## Radio Frequency

Our newest, non-invasive treatment is used for pain management and aesthetic purposes as it tightens, contours, and lifts skin. Electrical transmissions create a heating effect to a specific area of the body, increasing cellular metabolism and oxygen delivery. The treatment stimulates production of collagen, elastin, and new skin cells. Our patients are more than thrilled after just one treatment.

## Vitamins, Peptides and More

- Wharton's jelly Isolates, Stem Cells & Exosomes
- Modified Myers' Cocktail
- Vitamin C
- Glutathione
- Colloidal Silver
- Methylene Blue
- Homeopathies (traumeel, engystol, zeel)
- Chelation
- Semaglutide
- Vitamins & Supplements
